

What is Coronavirus and how are the horses?

The coronavirus is a virus that can make people sick

Doctors think the virus is spread by coughing, sneezing, or touching others

To stay healthy I can:

wash my hands with
soap and water

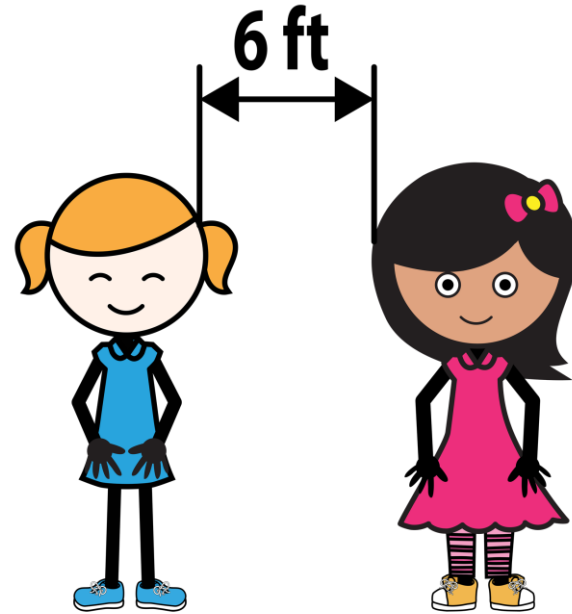

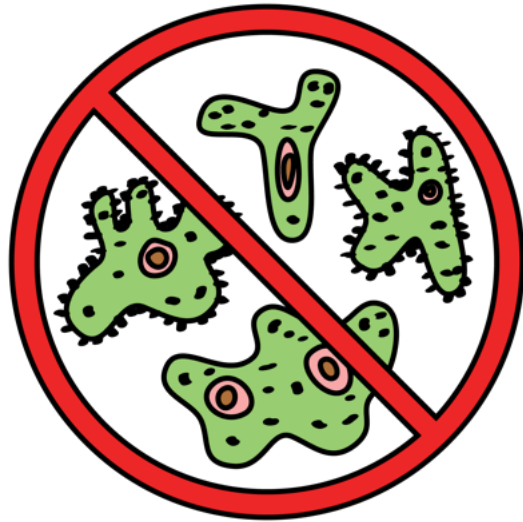

use hand sanitizer

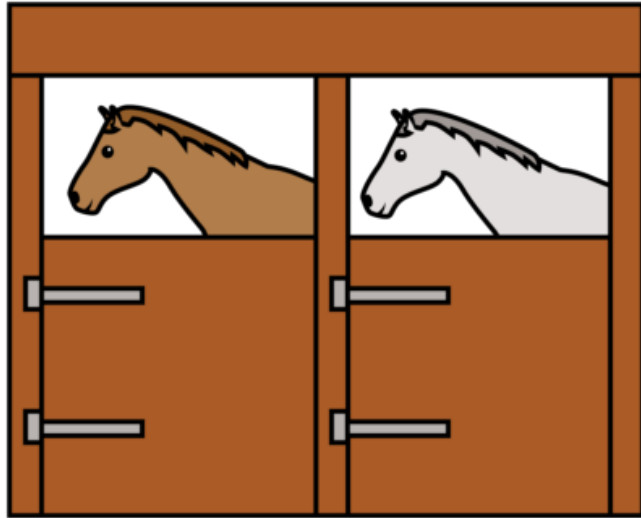

cover my nose and mouth
when coughing and sneezing

The barn is closed to help stop the spread of viruses

I know the horses are
still being cared for.

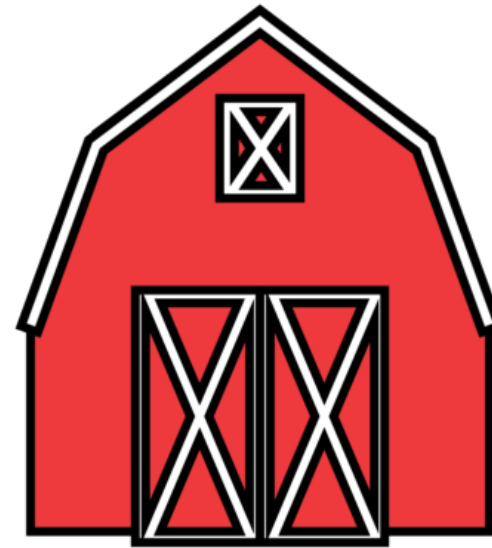

I know the horses are
still eating.

While I am away, I can talk to my favorite horse by sending them an email. I may even get a picture or email back!

The good news is the barn will open again.
